

Live Virtual Classroom e-Learning (VCeL)

Training issues around Time? Travel? Money?

Many organizations are investigating alternatives to traditional classroom “face-to-face” training. Budget constraints, travel restrictions, time out of office, and geographically dispersed workforces are common reasons for this trend.

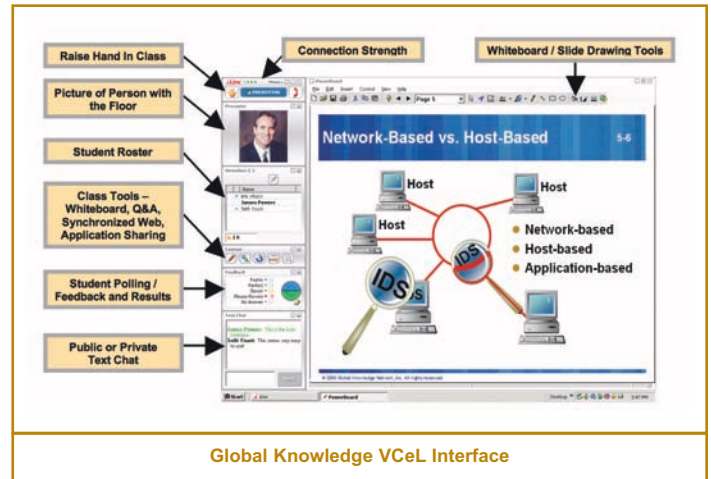

Global Knowledge’s Virtual Classroom e-Learning (VCeL) allows you to save time and money by bringing a live instructor with live labs right to your desktop. As one of the largest providers of virtual classroom training in the world, Global Knowledge currently offers more than 100 e-learning courses and delivers an average of 15,000 student hours of training each month.

Virtual Classroom e-Learning is...

- Live and Instructor-led with live labs.
- Renowned Global Knowledge classroom content without the inconvenience and cost of travel.
- Small class size – typically no more than 12 students.
- Intense, integrated skill practice and application discussion.
- Real time chat, polling, Q&A, application sharing and white boarding.
- Recorded session playback available 24/7.
- Available to anyone with an internet connection.
- Convenient for dispersed workforces.
- Flexible on content – yours, theirs or authorized vendor content.

Proven Quality

Break-through Virtual Classroom sessions, give students the same high-quality content taught by the same industry experts as in their facility-based classrooms delivered via the Internet. Students can train from anywhere in the world (from their office, home, a computer lab, or anywhere they have access to the Internet via a PC). They will receive personal attention and engaging peer-to-peer interaction through this highly interactive training. And it’s proven very successful - 94% of all their students would take another VCeL course from them.

Global Knowledge VCeL Interface

Flexible Delivery Methods

In addition to their VCeL delivery method, they offer other flexible delivery methods to help you meet your training goals, learning style, and budget.

Global Knowledge Delivey Methods
